ECLIPSES IN 1826.

There will be five eclipses this year, three Solar, and two Lunar; all invisible in New England.

I. The first will be of the Moon, May 21, at 10h. 33m. in the morning. The moon will set before the eclipse begins.

II. The second will be of the Sun, June 5, at 1h. 6m. in the afternoon, invisible by reason of the D's south latitude.

III. The third will be of the Sun, October 30, at 8h. 42m. in the evening; D's latitude south, and ☉ below the horizon, Ergo invisible to us, but visible in southern latitudes and W. longitude.

IV. The fourth will be of the Moon, November 14, at 11h. 17m. in the morning, after the moon sets. This eclipse will be visible and total to the inhabitants of a part of Asia.

V. The fifth will be a small eclipse of the Sun, November 29, at 6h. 57m. in the morning. The D's shadow will pass by us a little before the sun rises. The eclipse will be visible in the eastern hemisphere.

JUDICIARY OF THE UNITED STATES.

The Judicial power of the United States is vested in one Supreme Court, and in such inferior Courts as Congress, from time to time, may establish. The present judicial establishment of the United States, consists of a Supreme Court, of twenty-eight District Courts, and seven Circuit Courts, which are thus organized; the Supreme Court is composed of one Chief Justice and six Associate Justices, who hold a Court in the City of Washington annually; besides which, each of these Justices attends in a certain Circuit, comprising two or more Districts, appropriated to each, and, together with the Judge of the District, compose a Circuit Court, which is holden in each District of the Circuit. The District Courts are held, respectively, by the District Judge alone. Appeals are allowed from the District to the Circuit Courts, and from the Circuit to the Supreme Court: and, in some cases, where the inconvenience of attending the Court by a justice of the Supreme Court is very great, the District Courts are invested with Circuit Court powers.

REVOLUTIONARY REGISTER.

[Scarcely any thing connected with the revolution and with Gen. Lafayette. can be uninteresting at the present time. Most of the heroes of that day have passed away never to return. One of them returned to us after a long absence, and it must be a pleasure to the few survivors of the revolution to see the names of his associates in arms enrolled with his own.]

JACOB B. MOORE,

Printer and Bookseller, Concord, New-Hampshire,

PUBLISHES THE FOLLOWING APPROVED WORKS,

Which have become, or are becoming,

—> STANDARDS IN OUR SCHOOLS.

I.

MARSHALL'S SPELLING-BOOK, adapted to Walker's pronunciation. The very extensive sale of this excellent book within a few years, and its adoption by all enlightened teachers of our schools, are a sufficient recommendation.

II.

BLAIR'S LECTURES ON RHETORICK, abridged. The sale of more than 12,000 copies in three years, has proved the superiority of this edition.

III.

PIKE'S ARITHMETICK, abridged : new edition, greatly improved by an experienced arithmetician. With Questions, and a system of BOOK-KEEPING, suitable for farmers and mechanicks. **PIKE'S ARITHMETICK** is universally acknowledged to be the most complete system ever published in the United States. It is, in fact, the groundwork of **ADAMS**, and all the other arithmeticks in general use.

The peculiarities of this edition, are, its adaptation to the present state of the science, with the important improvements of a full explanation of the *reasonableness* of every rule, and its foundation in *principle*—of a series of questions—and of a short and simple System of **BOOK-KEEPING** ; such an one as will be useful to the farmer and mechanick.

IV.

NEW CIPHERING BOOK ; adapted to Pike's Arithmetick abridged : including a variety of useful Tables ; Promiscuous Exercises in all the rules : and Illustrative Notes. With entire *blank pages of fine paper*, sufficient for writing down all the most interesting operations of the scholar.

The design of this *New Ciphering Book*, or Atlas to Pike, is to prevent the too common practice among scholars of writing down their operations in the Arithmetick which they study—thereby disfiguring their book, and completely destroying its usefulness to another scholar ; for if a scholar make use of an Arithmetick which has all its sums worked out, it is easy to see with what facility he may go through his book, without even knowing any thing about its principles.
